HAPPY NEW YEAR!! Cograturation to your good health!!
Good luck !!! We shall work on our best!!!

1) PROGRESS FOR PREPARING TO ESTABLISH ABOUT THE PUBLIC FOUNDATION OF THE INTERNATIONAL ANTI-DESERTIFICATION ASSOCIATION.

Japan Desert Exproation Association had closed to project on 1979, and this closed bussiness had comleted on March of 1981.

Then Japanese goverment gave information to I.C.W.A. that Japanese goverment will recive to proporsall action for establish about the International Anti-Desertification Association.

I.C.W.A. had made up to organization for proporsal that is the people committee of public fandation of International Anti-Desertification Association, and gave those duccuments for Japanese goverment with request letter from China and U.S.A, Etc.

Those documents were received by the Ministry of Agriculture & Foresty & Fisher and Foreign Afair. They made up examination on the science and engineering among July to December on 1981.

2) JAPANESE GOVERNMENT GAVE CONSENT AND UNDERSTANDING TO START FOR ESTABLISH ABOUT PREPARING WORK OF THE INTERNATIONAL ANTI-DESARTIFICATION ASSOCIATION.

Japanese goverment made up checked of examination on so many institute and others of goverment system among July to December of 1981 about the Science and Engineering.

At last, Japanese goverment gave consent to start for establish on 18th December 1981.

And they gave understan for make up to publication about start of establish work on preparing committee of the International Anti-Desertification Association in Japan

Note Explain

Japan have some special condition of different than other countries on the world in this kind work of registration for Government.

Then people and other countries may be cannt understand to this I.C.W.A. News written point on realy.

Japan have special condition by goverment rule and raw on this case.

- a) Japanese government give permission to only one public organization for only one purpose work. It have very much strong control and check up of examination by all system of government. It shall have need to special connection and work on this case.
- b) Any work of organization are free by the Principle of Japan. But if people did not get permission of Japanese government on this work, they shall have get very much high Tax for collect money to expensive on this work by Japanese governments Tax office, it is very much heavy duty in real mean. Because this heavy Tax and duty give to Donetion side and reciver side in very much strong rule of tax office, then Donetion sides people and organization will request about publicity and public permission by government system that mean have strong close condition for people movement and active work to public and official work on all.
- c) If Japanese government gave permission to one organization that have completly close for other organization to all work on same purpose kind of publicity and officiality on Japan. That have not care for good or not, and exactry right or not on science and practicaly work about governments parmissen organization, and other organizations. People have completly shattered and close from Japanese government on Japan.

On these condition of Japan have make up to some iregular and unhelp condition on study and practicaly work in society and public work on people. On this case, Japan had development of Economical and Sociene Science work on Industries and production, some time this condition should made up danger condition of porution on people life.

Specialty Education and Study on science and Engineering have infruence by Government way on this case that might be not only Japan.

We must care for those fact and realty on the our World on all.

-
- 3) GREEN CROSSES ARMY AND FOUNDATION HAD PROPORSALED BY MR. TAKEICHI OHISHI AND HIS MEMBERS, AND IT HAD OPEN TO ALL JAPAN WITH ASAHI NEWS PAPER ON 1ST JANUARY 1982.

1st January 1982, Dr. Takeichi Ohishi made up voice with his member that they will make up to the Green crosses Army and found by the New purpos of human object on the world with the Ashahi News paper, who is the formal minister of the Environment ministry and the leader and president to the member of National Assebbly to the reduction of armanent, and he is member of the Counseller house on Japan.

I.O.W.A. had contacted to him what practicaly action and work are there on his voice?

He replied to I.O.W.A. that he have not any idea and practicaly plan on this voice, they will find out by disention with his member in nearly future.

But he told to I.O.W.A. on his letter of replied that he had awaered to lost condition of foresty on Japan and world, it is the most serionce and important matter on human life from present.

Fuyue

I.C.W.A. gave proporsall letter to him.

- a) Already I.C.W.A. answered to those fact of less forestry on the world that had started 25 years ago, then we had establish to I.C.W.A., we have basic and original thought from movement of Asia independent, and I.C.W.A. had succeeded to the Pliminal test of the Anti-Desertification problem, and started to the practicaly work on real area of the Desertification problem. I.C.W.A. had found real solve way on this case.
- b) I.C.W.A. had started to establish work for the International Anti-Desertification Association by consent of Japanese government.
- c) If they will give special situation on them recognition of their movement, and they will give real leadership by them trust about real practic work on the Anti-Desertification problem, I.C.W.A. will make up coraboration to them.

He said that he wish discastion with I.C.W.A.

4) ACTIVE PROFFECERES AND YOUNG PROUPE OF PEOPLE HAD STARTED TO STUDY AND ACTIVITY FOR PRACTICALY WORK TI LESS ENARGY AND THE ALTERNATIVE TECHNOLOGY ON THEM LIFE IN JAPAN.

I.C.W.A. tought for so many technology of people live and production to gandhian and India government member among 1955-1974 on all India and Japan. That were completed on 1975.

I.C.W.A. made up the Exhibition of Rulal Craft on India Japan at New Delhi, and show to all india people, and India goverment and Mascominication worker made up official voice that this exhibition was the most excellent and expart condition at India from India Independent period. This varasety have the Agriculture, Irrigation, Change kind for good of seed, cultivet way, good tools make way, plantation of trees, handhicraft, pottely and porcelen production way and Anti-Desertification technology, etc. Those technology had development to water wheel make way and Soner enargy ckook way, and others. Those are development to the Alternative technology and the Apropriat Technology on India Gandhian of people movement.

Profsscer Fumihiko Satofuka who is teach about the History of Science and Engineering on Sagami Weomen University had obsarveted to those India condition on his study, and he written of repport on the Magazin of Science and Engineering with Economy.

Some proffecer and young grepe on Tokyo and others had tried to made upfifer water wheel at slope of the South Alps mauntain line on Fujieda City of Shizuoka prefecture.

I.C.W.A. tried to guided for tought about practical work way with them on real area.

And those member had corabrated with member for development to Water Wheel system on Fukuoka Prefecture, and they had made up

Seminer for development way to water wheel and less energn technology on our life in Japan at Yabe river area on Fukuoka prefecture.

I.C.W.A. worked way on India having appointment to all world and Japan.

Then I.C.W.A. giving to them how development on science and engineering on technology of people life and production on our life that shall be bring to the New Civilization on the world.

5) A MEMBER OF I.C.W.A. SHALL BE SUCCESS TO SOLVE FOR SALINITY CONDITION OF DESERT AREA ON PERU COUNTRY.

A member of I.C.W.A. (International Anti-Desertification association) who is Nippe Co:Ltd had request the work for preliminary test to solve about the problem of salinity on agriculture farm land on near to Desert area of Peru by the Development plan of the World Bank with Peru Government.

On this case, I.C.W.A. taught technology about Anti-Desertification and gave guided to real condition for salinity action about desert area in practically by requested from the President of Nippe pipe Co:Ltd. Specialty I.C.W.A. taught to him how find out to good point of soil for make up about solve to salinity condition on soil of farm land that are very much important to research work for salinity condition on underground what water and salinity condition on this soil of desert area of Peru. This condition are very much serious to Nippe Co:Ltd, because they will make up drain system to solve for salinity condition about make up system of sheet pipe what point is the most essential for solve to Salinity condition on this soil of land of rice farm of Peru Desert area.

Nippe Co:Ltds president brought guide note letter of I.C.W.A. to Peru and he tried research work to real area by guide note, then he found out to exact condition about I.C.W.A. taught on this case.

Then Nippe Co:Ltd had made up good system to those land for real preliminary test system about the problem of solve to salinity condition of Peru.

And Nippe Co:Ltd informed to I.C.W.A. that they got good report to success for solve of salinity condition about land of desert area of Peru, and Peru people will make up rice plantation on this test area in this Spring.

Note

The Desert of Peru country have the most difficult condition on scientific details, because those area have only 15m/m ? /year rain fall that is the most few rain fall condition on the world.

On this work of this report, I.C.W.A. and Nippe Co:Ltd have the most exact and excellent work on science and Engineering work that had really profit. Those are very much usefull to desert.

6) APPOINTMENT OF I.C.W.A

I.C.W.A. had worked to development technology for people live and productions on India that are completed successed that are basic technology on peoples side. Those were efforted by almost only own expensive.

Unfortunately Japanese government made up organization of Japan International Collaboration Association that were successed or not, they have not care to real condition, then I.C.W.A. could not public work by permission from Japanese government. But I.C.W.A. had successed to the Anti-Desertification work on India, and those work had registration on India, and recognized on Australia and U.S.A. and contacted of official from China and Mexico, and Peru and other countries, and U.N. and R.P.U.N. etc.

I.C.W.A. had started to preparing for the International Anti-Desertification Association by Japanese government rule only.
