Printing office of I.C.W.A.

Happy New Year!! CONGRATURATION TO YOUR GOOD YEAR !!!

We shall have new year of advantage to our program for new plan on the Anti-Desertification work of the Earth.

We must care for progress to wide of Arid and Desert area that shall be over to 45-50% of face of land on the world.

Specialty, we have the most serious and careful condition of the Desertification problem that have rise up to the new Desertification problem by the Modernization agricultural work on the World.

We have use to big machine and mechanical method, and chemical manures that have destroy to condition of soil and increase for the Desertification area on the World.

And we had found out to very much dangerous condition for method of irrigation work that Dams and Wells are make up to Dry condition and Erosion action on land.

I.C.W.A. had worked to solve way for those problem on the World, and we had succeeded to solve way for get good effect in the fundamental problem of almost point on last year.

We shall be make up to solve way for the problem of Desertification by those Modernization agricultural work in this year.

We have almost solve way to this problem by our study of science on our view.

The Desertification problem have direct connection to the Food problem for our human life on the World.

We must solve to this problem on absolutely in true Humanity.

PROPOSAL TO ESTABLISH FOR THE ORGANIZATION OF SCIENCE AND
ENGINEERING OF THE DESERTIFICATION OR ANTI-DESERTIFICATION.

On face of the Earth, we have area of arid and desert that shall have over 50% of all land of the World.

We have organization of the Environment program United Nations to the Desertification problem on the World.

But we have not organization to solve way for the Anti-Desertification work on practicaly and real area with people on science and engineering.

It is the most and very much funny fact that we have not science to the Desertification problem on the World.

Some countries have effort to solve way for the Desertification problem area, but we have not information for solve way by the Anti-Desertification work on those area still now.

We have so many variety of part for Science and Engineering work to University and Governments systemes, but we have not part and departments of this science and engineering work.

Because this Desertification problem and the Anti-Desertification work are need Synthesis and Integration work for so many kind of science and engineering to real area and practical work on this project.

We have some troubles to science and engineering work for development way to our life on our mordanization period in present that had very much small part and departments on progress way.

The Desertification and Anti-Desertification problemes have very much wide and variety work of this fields to real and practical action for solve way.

Then Mordanization development work had not care for this fields, that they have not thought to solve way.

We must change to our view for solve way on those fact on our work in practicaly and realty.

This proporsal shall be make up to decid work for solve that shall be need so many congress and discussion on the World.

Congress and Discussion are very much neccessary for solve work to this problem, but we must make up mind, we have real fact that the Desertification problem are very much seriouce and the most most dangerouse matter on human life in present to future.

This condition had over 40% of all land on the World in already. Present condition, we shall have over to 50% of the all land of the World.

We have not much time for discussion and congress to this problem.

We nneed solve work to this problem on the World that is fact in truth.

HOW AND WHAT POINT HAD SUCCEEDED TO SOLVE FOR THE
ANTI-DESERTIFICATION PROBLEM BY I.C.W.A. ON THE WORLD.

On the Last Year, I.C.W.A. had succeeded for made up green on the Arid and Desert area that I.C.W.A. solve to the Fundamental matter for the Desertification and Anti-Desertification problem on the World. Those are next matter on this problem.

1) Plantation work to make up green for area of the Desertification.

I.C.W.A. had efforted to plantation work for area of the Desertification at the Punjab state of India among 1963-1982, and we had recognized to succeeded condition for the Anti-Desertification work by the Photograph picture of the Landsat that I.C.W.A. informed to the World by I.C.W.A. News No:22.

2) Plantation work for stop to Erosion action of Land on the Desertification area.

I.C.W.A. had worked for stop to Erosion action at Shiwalick Range area of the Most South Mountain line of Himalaya zone that have stratumes of sand and pables only. I.C.W.A. had found to Way of success for stop of Erosion on its test work by plantation with some special plants, that I.C.W.A. gave information of this fact to all world by I.C.W.A. News of special page.

3) Taken out to Salt for the Salinity Land.

A member of I.C.W.A. had succeeded for taken out of Salt to the Salinity Land by technology of Sheet Pipe work of irrigation system on the Desert of Peru country that name is the Nippo Co:lt'd in Fukuoka city of Japan.

I.C.W.A. taught and gave guid of technology and knowledges of stratumes on Desert and other condition for this work that is exact and successful on this case.

Peru government decided to public work of government system for the Nipo Co:lt'd.

4) How make up for development way to solve about the Anti-Desertification work with people life.

The Anti-Desertification work have absolut need to coraboration with themself action of people live and production among Goverments system work on real area of the Desertification problem.

Specialty the Anti-Desertification work have need of practical action by themself hand of people.

How understand and belive by themself on then life that is the most difficult problem on this case in realty and practicaly.

I.C.W.A. had worked to this problem on India among 1955- 1974, and I.C.W.A. had succeeded to development way for this problem. Then I.C.W.A. and the India goverment, and Gandhi Memorial National Foundation and ether had made up the Exhibition of Rulal Craft India and Japan at New Delhi in 1974 that had contain to the Anti- Desertification work with the most basic technology of production.

This is the most difficult problem on the world that have not solve to the Conference of North and South on U.N.

WHAT ORGANIZATIONS AND COUNTRIES GOVERNMENTS HAVE CONTACT OR
MAKE UP CONNECTION TO I.C.W.A. FOR THE ANTI-DESERTIFICATION WORK?

I.C.W.A. informed to so many organization of U.N. and governments of countries about work of the Anti-Desertification among 1975-1982, and I.C.W.A. had contact and connection to next organization and countries governments.

1) United Nations cabinet of Secretary General.

Dr. U. Tant received to my report about the Famine in India and others, and I.C.W.A.'s proposal letter for development way to Asia.

He contacted to I.C.W.A. and received to I.C.W.A. idea about so many, but he sent a letter only by died.

Mr. Kurt Waldheim sent letter to I.C.W.A. and requested to I.C.W.A. that shall have work to situation of U.N. member, but U.N. have situation of governments side, and have not practical work to the Anti-Desertification problem. I.C.W.A. give information.

2) U.S.A. Department of Interior, Land Managements Desertification Assessment had contacted to I.C.W.A., that they wish my visit and discussion about the Anti-Desertification work on U.S.A., and they sent so many documents of report and literatures.

I.C.W.A. had knowledges and real condition of the Desertification problem on U.S.A.

3) C.S.I.R.O. of the Australia Government.

C.S.I.R.O. gave invitation letter to I.C.W.A. and they requested literature for conference to the 2nd International Conference of the Rangeland problem on the World.

And C.S.I.R.O.'s Annual Report of Arid zone had so many report of the Anti-Desertification work on I.C.W.A. by I.C.W.A. News.

4) India governments the Prime Minister Mrs. Indira Gandhi cabinets Deputy Secretary contacted to I.C.W.A. that they asked to I.C.W.A..

India government wish make up cooperation work with I.C.W.A. about the Anti-Desertification and other problem in theirin, and India governments Agricultural Ministries I.C.A.R. sent letter to I.C.W.A. that they will touch to Japanese government about I.C.W.A. work.

5) China governments Forestry Science Ministry sent so many science literatures and documents of the Anti-Desertification work on China continents land, and they have very much interest to I.C.W.A. way and plan of the Anti-Desertification work, and they wish more development to this work with I.C.W.A. that shall have arrangement among China Government Foreign Affairs Ministry and Japanese Government in nearly future.

6) Asian Development Bank contacted to I.C.W.A., and they having discuss for find out to cooperation work with I.C.W.A.

7) I.C.W.A. have contact with next Countries Government.

Middle East Asia—Pakistan, United Arab Emirates,
Kuwait, Israel,.

Africa—Morabia, Libia.

Middle America—Mexico.

South America—Peru.

On those connection, I.C.W.A. wish establish for solve to the International Anti-Desertification Association, and the International Anti-Desertification Technology Training Center on Japan and some area.
