and Anti Desertification Problem

No: 7

A REPORT FOR THE ANTI-DESERTIFICATION WORK  
ON THE WORLD

1st February 1984

24-12 Daymyo Ichome  
Fukuoka Japan 810

  
Tatsumaru Sugiyama  
General Secretary  
I.C.W.A.

CONGRATURATION !!!

Happy New Year !!!

We shall have development for solve to the Problem of Human alive on the Earth in this year. Already our Earth, our land had desertification on over 50%, we have only 15% land of Earth for production to foods.

I.C.W.A wish give a information to you that had recognition to succeeded for the Anti- Desertification work at Punjab of India, you already received I.C.W.A. News NO:5 and 6 to those fact by the Photograph of Land Sate. And we will give this information for learn to all world at the 2nd International Rangeland Congress in Adelaid of Australia on 13-18 May 1984( this year).

The war of Nuclear Atomic Bomb shall have make up desert on even for moment, but we can stop for use on our make up mind. Desertification problem had development from our live and civilization, then we need more strong make up mind and effort on lang view and basic thought and practicaly work of reality.

How solve to this problem on all view of human culture? How development to solve way by our reality and practicaly work? I.C.W.A. had done on this information.

I.C.W.A. having effort to progress way for all world with make up coraboration activity on the World.

U.N. having start to the Trees project, and they requested answord from I.C.W.A. on this case.

# 2ND INTERNATIONAL RANGELAND CONGRESS

PJJ:AOC

Secretary:

18th April, 1983

P.J. Joss,  
CSIRO,  
Rangelands Research Centre,  
Private Bag,  
DENTILIQUE, NSW 2710  
Australia.

Phone 058 81 1131

Telex: 55457.

On behalf of the Organizing Committee I have pleasure in inviting you to chair a Hall Colloquia session in the Symposium

## "Technological Improvements of Arid Rangelands"

You will understand that the Congress has insufficient funds to provide you with financial support. Nevertheless I would be pleased to support any application for funds that you make on your own behalf.

15TH SEPTEMBER, 1983

I wish to acknowledge receipt of your Synopsis entitled:-

## CHANGE OF WATER LEVEL AND CONDITION OF ECOLOGY IN THE ARID AREA BY PLANTATION.

6th October, 1983

I made some minor grammatical corrections to your paper and it is quite comprehensible and acceptable for the publication.

You are correct in saying that the Congress is not sponsored by the Australian Government - it is being organized by the Australian Rangeland Society - naturally the various Government Departments interested are kept informed.

I will again send details to the Embassy of Japan and the Australian Embassy in Tokyo with a short letter of explanation.

Dr. Wilson will comment on the Training Centre proposal, for the Australian Government, after he has discussed it with you in Adelaide.

Yours Faithfully,

  
PETER J. JOSS  
Secretary

\* Those letter had collected sentence of letter from Mr. Peter J. Joss who is the Secretary of 2nd International Rangeland Congress.

Dr T. Sugiyama  
General Secretary  
International Culture and  
Welfare Association  
24-12-1 Chome Daimyo  
Chuoku Fuknoka  
JAPAN - 810

Dear Dr Sugiyama

I have been asked to reply to your letter of 15 May 1983 to Senator Walsh, the Minister for Resources and Energy, regarding co-operation between Australia and Japan in anti-desertification work. I was interested to learn of your successful projects in India, and agree that Australian workers in this field might benefit from studying your reports.

We have recently been in contact with Dr Ralf Buckley, Environmental Consultant at AMDEL. Dr Buckley explained that you had been in contact with him for several years. Like yourself, Dr Buckley is keen to promote international co-operation in anti-desertification work and other aspects of arid zone ecology, and looks forward to meeting you at the Second International Rangelands Congress in March 1984.

I understand that your arrangements to attend the Congress are being made through the CSIRO Congress Secretariat. I trust that your discussion with Australian representatives will provide opportunities for furthering co-operation between our two countries in combatting desertification.

Yours sincerely

K.E. Thompson  
First Assistant Secretary  
Environment Division

## THE PROPOSAL OF I.C.W.A.

This I.C.W.A. News gave information of the Anti-Desertification work on the World, then you might be learned to some fact on this case. NO:7 news also have request and desire for make up the coraboration work to Combatting Desertification from Australia.

Unfortunetly, I.C.W.A. recived letter from Japanese governments Foreign Affair and Agricultural & Forestry Fisher Ministries have not study and resarch, and activity work on thier system and the organization, then they could not make up consideration and service to this field, and they desire for development to this work on side of common people.

We have awake up to the fact that goverment administration work have some defect on activity development way of Human life.

Land of the Earth have over 50% Desertification problem, but Goverment and University have not study on all science, it is true fact that shall be not only Japan, some country goverment have the system and organization of Desertification problem, it is the base for exactory recognized to real fact on scientific work.

But how solve to the Desertification problem that is the most seriouce problem on all human life.

We had learned to solve way for this problem by the Dames system and Pipe line on U.S.A. and Israel, we are recognized that work are good way, but we had learned that those use place and area are few on real Arid and Desert area, and have some defect on U.S.A. land and the Aswan High Dames of line of Nail river on Egypt.

I.C.W.A. had gave information that Plantation way can solve and possibility for the Desertification and Anti-Desertification, it shall have make up good coraboration work with people of real area and other countries.

Becouse Foods problem by development of the Desertification will give the most seriouce inpact of dangerouce condition on all human life in present to future.

We shall have establish to the International Anti-Desertification Association on the World with U.N. and goverment and people.
